

In Vehicle Parking Meter (IVPM)

Clear Token provides the safest, most secure wireless platform for mobile parking payments

Easy and convenient for Driver & Commercial Trucking

- Use the Clear Token Smartphone Application
- No Cash Needed.
- This device can be used as a Beacon
- No waiting or queuing to pay Meter.
- No need to find a working meter, you can even park at a broken meter.
- Pay for time used only (where allowed by parking operator).
- Receive a warning before parking session is over.
- Can be used for other metered parking applications including:
 - Permit Parking
 - Residential
 - Rail, Airport, Beach
 - Congestion Pricing
 - On & Off Street
 - Prepaid Event Parking
 - VIP Parking
- Park prior to parking regulations starting, and have your unit work and only charge when the regulations go into effect.
- Extend parking.
- Time left is shown on cell phone.
- Warning message alerting time ending.
- Very easy for handicapped drives to operate – No ADA issues, since everything can be done from a vehicle.
- User comfort level increases knowing that enforcement personnel will visually see you have paid for parking.

Reduced Costs

- Up to 50% less cash handling at your meters.
- Less use of paper than at Multi Space meters.
- Free space usage and availability reports provided by Clear Token
- Understand customer needs and parking patterns.

Enforcement

- Unit verification software of IVPM.
- Enforcement personnel do not have to look up every pay by cell transaction.
- The app can show plate numbers in list or single vehicle application.

Unit Cost

- \$49.95
- \$1 Per Month or \$12 year maintenance & license charge.
- No transaction charges from Clear Token.
- For promotion, city may provide purchaser \$10 free parking with unit. In the long run the City will make this up with saving from less cash handling and wrongful ticketing issues.

Enforcement

Easy to enforce. Like a single space meter, if the display isn't flashing "PAID" write a ticket. No need for special electronic equipment – even hand written tickets work. Anti-counterfeit verification software eliminates "spoofing".

Connection to the Internet is NOT required

All communications are between sign and user's cell phone and the cell phone and the Clear Token cloud.
